Skills

- Diagnose trauma, injuries, infections, tumors and other problems that require surgical procedures to correct.
- Examine and treating patients for issues with bones, joints, and ligaments related to injuries or diseases.
- Ensured patients understood their diagnoses, received relevant information about all

I am a competent and skilled Orthopedic surgeon, highly motivated and enthusiastic to develop further knowledge and skills to grow professionally and personally. Works hard and enjoys being a member of a team. Efficient in handling ward duties and managing emergencies. I am proficient in understanding and communicating with the patients.
